

# Splitter

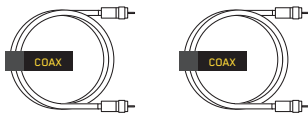

**When connecting your devices to the coaxial outlet, use the splitter if:**

- you're using our home phone service
- you only have one coaxial outlet

## Tips

- If need be, use the coaxial cables provided with your Helix Fi gateway.

- Restart your telephone modem (MTA) after the installation.
- If you can't disconnect your equipment because of a security socket, use the security socket remover.
- If there's a filter on your modem, you can remove it and put it in the recycling bin.
